

# Atrisco Roadway Improvements Public Meeting

Bernalillo County Public Works Division is planning improvements for Atrisco Road, SW between Bridge Boulevard, SW and Five Points Road, SW. The purpose of this project is to improve pedestrian facilities and to relieve stormwater ponding within this segment of roadway. All residents and business owners within the project area are invited to attend a public information meeting to view plans and provide community input prior to construction. The first public meeting was held on October 24, 2005. **The second public meeting will be held at 6:15pm on Monday, January 23, 2006, at the Westside Community Center. The address is 1250 Isleta Boulevard, SW.**

The new roadway improvements include construction of curb and five-foot wide sidewalk along the east side of Atrisco Road between Bridge Boulevard and Five Points Road and the addition of curb and sidewalk along the west side of the roadway between Hooper Road and Eucariz Road. Once the project is completed, pedestrians will have sidewalk access on both sides of Atrisco Road for the entire roadway stretch, tying into existing improvements as well as proposed improvements from other projects. Additionally, a 24-inch diameter storm drain will be constructed under Atrisco Road between Eucariz Avenue and the Isleta Drain to discharge stormwater runoff to the Isleta Drain. Concrete driveways are proposed to provide access to the residences along Atrisco Road.

Since the last Public Meeting, residents' concerns have been addressed on the design plan set. Individual property owner interviews have been conducted with the property owners whose driveway access will be affected during construction. Also, speed control measures have been added on Atrisco Road near the intersection of Larrazolo after a conducted speed study showed a significant number of speeders at that intersection. The new roadway facilities will provide much safer travel along Atrisco Road for both pedestrians and vehicular traffic.

The estimated cost for these roadway improvements is \$1 million dollars. Funding is provided by Bernalillo County and state legislative appropriations. Atrisco Road is scheduled to go into construction in early 2006.
